

Privacy Policy for Nowhere

Last updated: August 31, 2026

Nowhere ("the App," "we," "us," or "our") is a GPS location simulation tool designed for Android devices. This Privacy Policy explains what information the App accesses, how it is handled, and your choices regarding your data. By downloading, installing, or using Nowhere, you agree to the terms outlined in this Privacy Policy.

1. Information We Collect

Nowhere is built with privacy in mind and is designed to minimize data collection. Below is an overview of what the App accesses and why:

Location Data

- **Simulated location (mock GPS):** The App utilizes Android's `LocationManager.addTestProvider` API to configure a simulated (fake) GPS location on your device. This data is generated locally on your device and does not reflect your actual physical location.
- **Real device location (optional):** If you explicitly grant location permission, the App may access your real GPS coordinates exclusively to help you select a starting point on the interactive map or center the map view. This data is processed entirely on-device and is never transmitted to our servers.

Network & Hotspot Data

- If you use the hotspot GPS tethering feature, the App transmits simulated location data over your local network (via HTTP on port 8088 and NMEA over TCP on port 10110) to other devices connected to your personal hotspot. This data remains strictly on your local network and is not sent to us or any third party.

Advertising Data

- The App uses rewarded video ads to unlock certain features. Our advertising partner(s) may collect device identifiers (such as the Android Advertising ID), your IP address, and general usage metrics to serve, personalize, and measure ad performance. Data collection by ad networks is governed by their respective privacy policies (e.g., Google AdMob).

App Usage & Crash Data

- We may collect anonymous, aggregated crash reports and performance diagnostics to help identify bugs and improve overall app stability. This data does not include your simulated or real location history.

2. Information We Do NOT Collect

- We do not track, log, or store your real-world location history.
- We do not sell, rent, or trade your personal data.
- We do not access your contacts, SMS messages, photos, microphone, camera, or other unrelated applications on your device.

3. How We Use Information

Information accessed or processed by the App is used strictly for the following purposes:

- Providing mock location and route simulation functionality.
- Enabling local hotspot GPS tethering between your connected devices.
- Displaying rewarded advertisements to support the free operation and maintenance of the App.
- Diagnosing technical issues and improving app performance.

4. Third-Party Services

The App integrates with select third-party services, each governed by its own independent privacy policy:

- **Ad Network** (e.g., Google AdMob) — for delivering rewarded video ads.
- **Map Tiles** (osmdroid / OpenStreetMap) — for rendering map visuals during route selection.

We encourage you to review the privacy policies of these third-party providers to understand their specific data handling practices.

5. Permissions

To deliver its core features, Nowhere may request the following Android permissions:

- **Location (Fine / Coarse):** Required to configure the mock location provider and optionally center the map on your current real position.
- **Network / Wi-Fi State:** Required to manage local network connections for hotspot GPS tethering.
- **Internet:** Required to load map tiles and fetch advertisements.

You retain full control and may revoke any permission at any time through your device's system settings.

6. Data Security

We implement reasonable technical and administrative security measures to protect data processed by the App. However, no method of transmission over the internet or electronic storage is 100% secure, and we cannot guarantee absolute security.

7. Children's Privacy

Nowhere is not directed at children under the age of 13 (or the applicable minimum age in your jurisdiction). We do not knowingly collect personal information from children. If you believe a child has provided us with personal information, please contact us so we can take appropriate action.

8. Intended Use

Nowhere is provided strictly as a location-testing and simulation tool for legitimate purposes such as software development, app testing, privacy protection, and route planning. Users are solely responsible for ensuring that their use of the App complies with the terms of service of any third-party platforms and all applicable local laws.

9. Your Choices

- **Revoke Permissions:** You may disable location or network permissions at any time via your device settings.

- **Ad Personalization:** You may opt out of personalized advertising by configuring your device settings (e.g., Settings > Google > Ads > Opt out of Ads Personalization or resetting your Advertising ID).
- **Uninstallation:** You may completely cease all data processing by uninstalling the App from your device.

10. Changes to This Policy

We may update this Privacy Policy from time to time to reflect changes in our practices, technology, or legal requirements. Updated versions will be posted on this page with a revised "Last updated" date. Continued use of the App following any updates constitutes your acceptance of the revised policy.

11. Contact Us

If you have any questions, concerns, or feedback regarding this Privacy Policy, please contact us at:
